WORK EXPERIENCE

FULL STACK SOFTWARE DEVELOPER | US ARMY

March 2019 - Present | Wiesbaden, Germany

- Implemented solutions for tracking and validating the training requirements for the members of the organization, as well as their positions and titles within the organization's hierarchy.
- Leveraged my cybersecurity experience to design the system with the protection of PII in mind.
- Used Python for automating and deploying the application and SQL for querying the database.
- Expanded my knowledge of UI/UX design while overseeing the entire project.

SYSTEM ADMINISTRATOR | US ARMY

March 2019 - Present | Wiesbaden, Germany

Cybersecurity Analyst

- Earned commendations for diligence and dedication by managing and validating various system policies.
- Demonstrated leadership capabilities by training a team of soldiers to increase readiness in emergencies; provided and coordinated critical support under heavy workloads.
- Managed an account for a battalion sized element, along with three network enterprise centers with smaller sized elements within.

Sys Admin/Net Admin at Regional Cyber Command Europe

- Established, managed and was responsible for troubleshooting a key network as a Tier I/II Technician at the United States Army headquarters Security Assistance Group - Ukraine, using practices that were later adopted as a golden standard.
- Supervised geographically separate service outages and improved related service processes at the Regional Cyber Command Europe.
- Noted for vital contributions in creating a wireless solution to support 300+ assets to improve operations and transactions, increasing reliability despite challenges.
- Selected to oversee the distribution and management of a lifecycle replacement valued at over \$400k.
- Unmatched commitment to customers lead to the completion of over 100 tickets in Remedy and many on the spot IMO fixes.
